## **EVENT REPORT**

Title of The Program: Workshop on WORDPRESS

Date: 06-08-2020

Participants: 46

Description:

The Coders club organized a workshop on WORDPRESS. WORDPRESS is an open source software used to create a beautiful website, blog, or app. WORDPRESS is software designed for everyone, emphasizing accessibility, performance, security, and ease of use. The resource person demonstrated various applications that can be created using WORDPRESS. The students found the software very interesting and user friendly. The participants were very much interested in having more workshops.

## EVENT REPORT

Title of The Program: Introduction to android development using KOTLIN

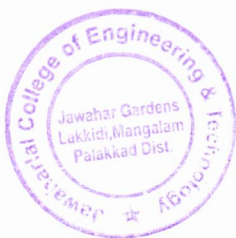

Date: 10-04-2021

Resource Person: NITHEESH AG, RIAFY Technologies

Participants: 50

Description:

Kotlin is concise and expressive programming as it reduces the boilerplate code. Since Google I/O 2019, Android development has been Kotlin-first. Kotlin is seamlessly integrated with the Android Studio and many companies are moving the entire code base from Java to Kotlin. The resource person an alumnus of JCET was able to create an atmosphere which was very relaxing and cleared many doubts the participants were having. Many students who had already created android applications expressed their view on Kotlin. The workshop created a new interest towards KOTLIN and android programing among students.

### **EVENT REPORT**

Title of The Program: 3D printing in entrepreneurship

Date: 31-10-2020

Resource Person: Mr. Arul Regan, Monotech, Chennai

Participants: 60

Description:

3D printing has so far benefited larger companies to a greater extent. Lower technology costs have made 3D printing relevant to entrepreneurs. 3D printing enables to alleviate all major challenges faced by entrepreneurs. As a manufacturing technic which is relatively simple and the ability to create complex models, 3D printing is widely used. The resource person was very informative and demonstrated various aspects of the technology. Some of the models shown in the program generated a new interest towards 3D printing among the participants. The program was very much appreciated by the students.

## **EVENT REPORT**

Title of The Program: Technical talk on photonic integrated circuits

Date: 4-12-2020

Resource Person: Dr. Srinivas Talabuttla, IISc Bangalore

Participants: 43

Description:

A photonic integrated circuit (PIC) or integrated optical circuit is a device that integrates multiple (at least two) photonic functions and as such is similar to an electronic integrated circuit. The major difference between the two is that a photonic integrated circuit provides functions for information signals imposed on optical wavelengths typically in the visible spectrum or near infrared 850 nm-1650 nm. Dr. Talabuttla explained the use of photonic integrated circuits in the field of optical communication and biomedical engineering. The session was very much informative and the participants found it very interesting.

### EVENT REPORT

Title of The Program: Quantitative Data Analysis in R using STATCRAFT

Date: 18-11-2020

Resource Person: Subhadip Dey & Suryasen Das, STATCRAFT Bangalore

Participants: 40

Description:

STATCRAFT is a web server based statistics and analytics platform that runs on the R statistical language and is accessed through a browser based GUI. STATCRAFT provides a wide range of statistical techniques and is used by a number of academic institutions in the country including IIM Ahmedabad, Mumbai University, Pune University and Gujarat Forensic and Science University. The session was very interesting and the participants gained a lot of knowledge from it.
